

Nagarjuna Treatises

The protector Nagarjuna, one of the great Pandits of the famous Nalanda University in India, was prophesied to be the bodhisattva propagating the teachings on emptiness.

Nagarjuna's treatises on reasoning were compiled into the དབུ་མ་རིགས་ཚོགས།, the *Collection of Madhyamaka Reasoning*, and Rinpoche has with great enthusiasm taught several of these texts on many, many occasions.

This has also resulted in a composition called *Sun of Wisdom*, ཤེས་རབ་ཉི་མ། which you will also find here. There are two further collections as well:

- གཏམ་ཚོགས། *Collection of Advice*
- བསྟོད་ཚོགས། *Collection of Praises*
